

# PROFESSIONAL DEVELOPMENT

## Project Based Learning

Want to teach your students STEM in a learning context that reflects life beyond the classroom? During the ILC professional development sessions, teachers are exposed to problem based learning (PBL) as a basis to STEM learning and critical thinking.

## Culturally Responsive and Inquiry STEM Teaching & Learning

## Affective Dimensions of Science Teaching

## Culturally Responsive

High quality teachers of diverse students understand the necessity of incorporating culturally relevant science pedagogical strategies for maximum student engagement. ILC professional development sessions are designed to teach K12 teachers how to successfully integrate culturally responsive strategies in their STEM classrooms.
